

For the **2025-2026 hiring cycle**, Accenture has significantly updated its recruitment process for B.Tech freshers. While the image you provided covers the traditional structure, there are critical changes for the current batch, particularly regarding the **Gamified Cognitive round** and the **Elimination status of the Communication round**.

Here is the updated breakdown of the **4 main stages** for the 2025-2026 cycle:

1. Online Assessment (Total: 90–120 mins)

This is a single-sitting assessment delivered on platforms like **AON-CoCubes** or **HackerRank**. It is divided into three distinct sections, all of which are **elimination-based**:

- **Part A: Behavioral & Gamified Cognitive Assessment**
 - **Behavioral:** ~50–60 psychometric questions (non-elimination but mandatory).
 - **Cognitive (New Pattern):** Unlike previous years, the traditional English/Reasoning MCQs are often replaced by **3 mini-games**. These include pathfinding puzzles (Grid/Rat), memory recall, and fast arithmetic bubbles. This is an **elimination round**.
-
- **Part B: Technical Assessment (MCQs)**
 - **Covers:** Common Applications/MS Office, Pseudocode, Networking, Cloud, and Cybersecurity.[1][2]
 - **Structure:** Usually 45 questions in 45 minutes. You must clear a sectional cutoff to proceed.[1][3]
-
- **Part C: Coding Assessment (Elimination)**
 - **Structure:** 2–3 questions in 45–60 minutes.
 - **Content:** Questions usually involve Arrays, Strings, or basic DSA. For the 2026 batch, some assessments also include one **SQL query** or a small **Front-end (HTML/CSS/JS)** task.[2]
-

2. Communication Assessment (AI-Driven)

- **Status:** For the 2025-2026 cycle, this has become an **Elimination Round** in most campus and off-campus drives. Candidates who do not meet the AI's threshold for clarity and fluency are being rejected before the interview.
- **Tasks:** Read aloud, repeat sentences, Q&A (one-word responses), and retelling a short story. It tests pronunciation, fluency, and sentence mastery.[4]

- **Duration:** ~20–30 minutes.[2][5]

3. Interview Round (Combined Technical + HR)[6]

- **Structure:** One combined virtual interview with 1–2 panelists.
- **Technical Part:** Focuses on your Final Year Project, Core Subjects (OS, DBMS, OOPS), and your preferred programming language.
- **HR/Behavioral Part:** Focuses on your resume, internships, teamwork experiences, and why you want to join Accenture.
- **Duration:** 20–30 minutes.

Summary of Key Updates for 2025-2026:

Feature	Previous Pattern (Image)	2025-2026 Batch Update
Cognitive Round	Traditional MCQs (English/Logic)	Gamified (Games/Puzzles)
Comm. Assessment	Non-Elimination	Strict Elimination Round
Coding Round	Standard DSA	DSA + SQL/Front-end (occasionally)
Elimination Logic	Progressive (Wait for results)	Often " On-the-fly " (Results for Round 1 appear immediately)

Pro-Tip: Focus heavily on **Pseudocode** (predicting outputs of loops/pointers) and the **Communication Round**, as these are currently the stages where most B.Tech freshers are being filtered out.
